

Academic Improvement Scholarship

CHAN KA LOK

Associate of Engineering

Ka Lok said he had a feeling that he was like “a fish out of the water” when he joined Year I of this College in 2017. He said, “There is a big difference between what we learn in a community college and high school. Here at the College, students have to think critically and quantitatively. It was a big challenge for me in Year I.” However, Ka Lok is not a person to give up easily. Neither are his teachers. Seeing his difficulties, the teachers offered him intensive guidance in his studies; and, through his own great efforts and commitment, Ka Lok has now overcome his initial difficulties. Ka Lok’s change is practically reflected in his academic scores. In one semester’s time, he has turned his scores card from dominance by B’s/C’s into one filled with A and B grades. His academic improvement is remarkable!
